

SOFTBOX **RADIAL** ICON SET 2

RADIAL ICON SET

Radial icon set is a series of clean & professional icons for Windows applications and Docks like Rocketdock, Objectdock, XWindows Dock etc. The curvy profile of the icons makes it different from others. It is the hybrid version of a square & a circle, this makes the icons unique. It fits greatly with any dock theme. Radial icon set 2 is the second installment of the Radial icon set series, there are still more Radial icons to be released in future as they are currently being engineered by our professional designers.

USING THE RADIAL ICONS

The icons inside this pack must be used for personal purpose only. If you are willing to use it for any commercial purpose like on websites etc. provide the link to the author by commenting it on the deviantart page of this product or contact the author via our deviantart profile page.
